CSS Cheat Sheet

Selectors

| | |
|--------------------------------|--|
| <code>div</code> | all DIV tags |
| <code>div, spam</code> | all DIV tags and all SPAN tags |
| <code>div span</code> | all SPAN tags inside DIVs |
| <code>#content</code> | element with ID "content" |
| <code>.box</code> | all elements with CLASS "box" |
| <code>ul#box</code> | UL tag with ID "box" |
| <code>span.box</code> | all SPAN tags with CLASS "box" |
| <code>*</code> | all elements |
| <code>#box*</code> | all elements inside #box |
| <code>a:link, a:active,</code> | links in normal state, in clicked state, |
| <code>a:visited</code> | and in visited state |
| <code>a:hover</code> | link with mouse over it |
| <code>div > span</code> | all SPANs one-level deep in a DIV |
| <code>div + span</code> | all SPANs preceded by DIV |

Text

| | |
|------------------------------|---|
| <code>font-family</code> | font used, e.g. Helvetica, Arial |
| <code>font-size</code> | text size, e.g. 60px, 3em |
| <code>color</code> | text color, e.g. #000, #abcdef |
| <code>font-weight</code> | how bold the text is, e.g. bold |
| <code>font-style</code> | what style the text is e.g. italic |
| <code>text-decoration</code> | sets a variety of effects on text, e.g. underline, overline, none |
| <code>text-align</code> | how text is aligned, e.g. center |
| <code>line-height</code> | spacing between lines, e.g. 2em |
| <code>letter-spacing</code> | spacing between letters, e.g. 5px |
| <code>text-indent</code> | indent of the first line, e.g. 2em |
| <code>text-transform</code> | applies formatting to text, e.g. uppercase, lowercase, capitalize |
| <code>vertical-align</code> | align relative to baseline, e.g. text-top |

Box Model

Borders and Dimensions

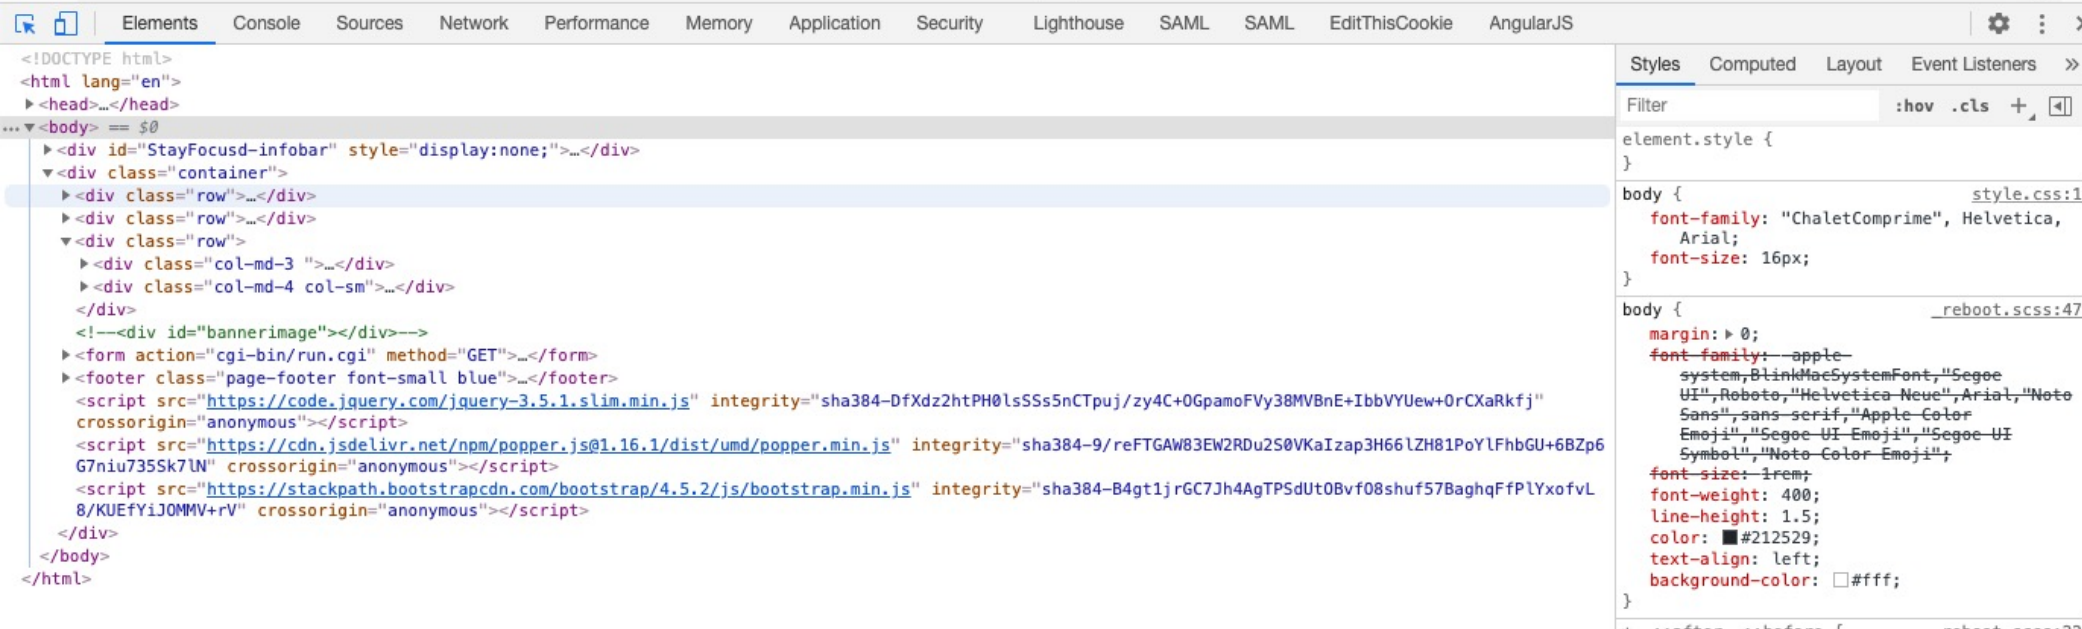

| | |
|----------------------------|--|
| <code>border</code> | sets border style for all borders, in the format: border: (solid, dashed, dotted, double) (width) (color), e.g. border: solid 1px #000 |
| <code>border-top</code> | sets border style for a specific border (same property syntax used for padding and margin, e.g. margin-left) |
| <code>border-bottom</code> | |
| <code>border-left</code> | |
| <code>border-right</code> | |
| <code>height</code> | sets height of an element |
| <code>max-height</code> | sets maximum height of an element |
| <code>min-height</code> | sets minimum height of an element |
| <code>width</code> | sets width of an element |
| <code>max-width</code> | sets maximum width of an element |
| <code>min-width</code> | sets minimum width of an element |

Positioning

| | |
|---------------------------------------|--|
| <code>Position</code> | place elements on screen, e.g. absolute, fixed, relative |
| <code>float</code> | stacks elements horizontally in a particular direction, e.g. left |
| <code>top, left, right, bottom</code> | specifies the offsets used in absolute, fixed, and relative positions, e.g. top:10px;left:10px |
| <code>display</code> | sets how the elements is placed in the doc flow, e.g. block, inline, none |
| <code>z-index</code> | sets the stracking order of elements, e.g. z-index of 1 is below z-index of 2 |
| <code>overflow</code> | sets what happens to content outside of container, e.g. auto, hidden |

Everything Else

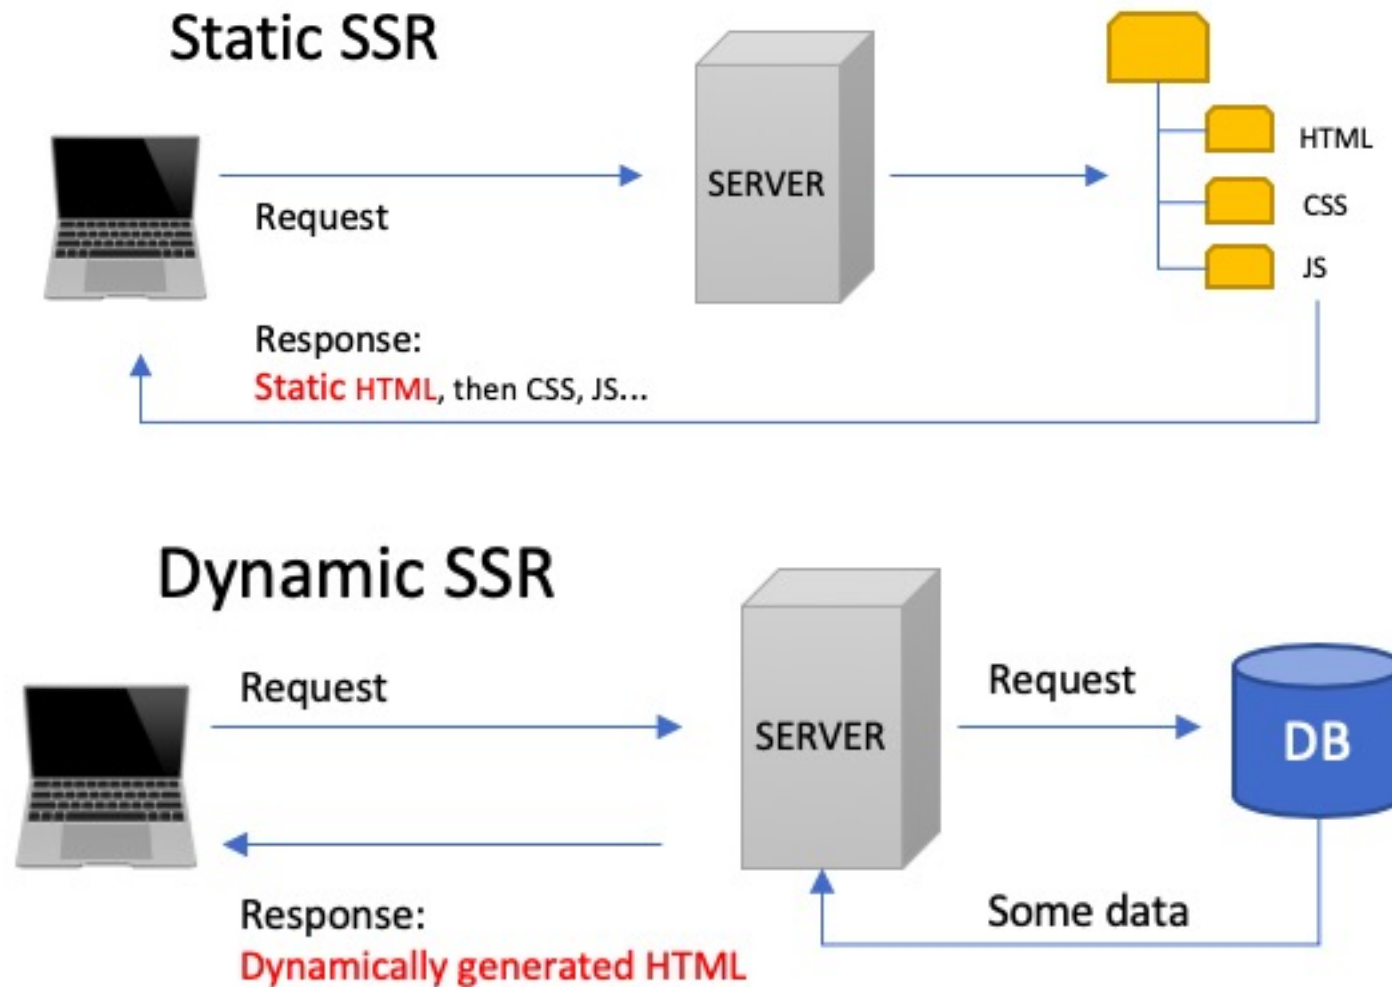

| | |
|-------------------------|--|
| <code>background</code> | sets background of an element, in the format: background: (color) (image) (repeat) (position), e.g. background: #000 url(bg.png) repeat-x top left |
| <code>cursor</code> | sets shape of cursor, e.g. pointer |
| <code>outline</code> | a border drawn around an elements that doesn't affect the box model |
| <code>clear</code> | sets on what side a new line starts in relation to nearby floated elements, e.g. left, right, both |
| <code>box-shadow</code> | attaches one or more shadows to an element |
| <code>box-sizing</code> | defines how the width and height of an element are calculated: should they include padding and borders, or not. |

Apache HTTP-server

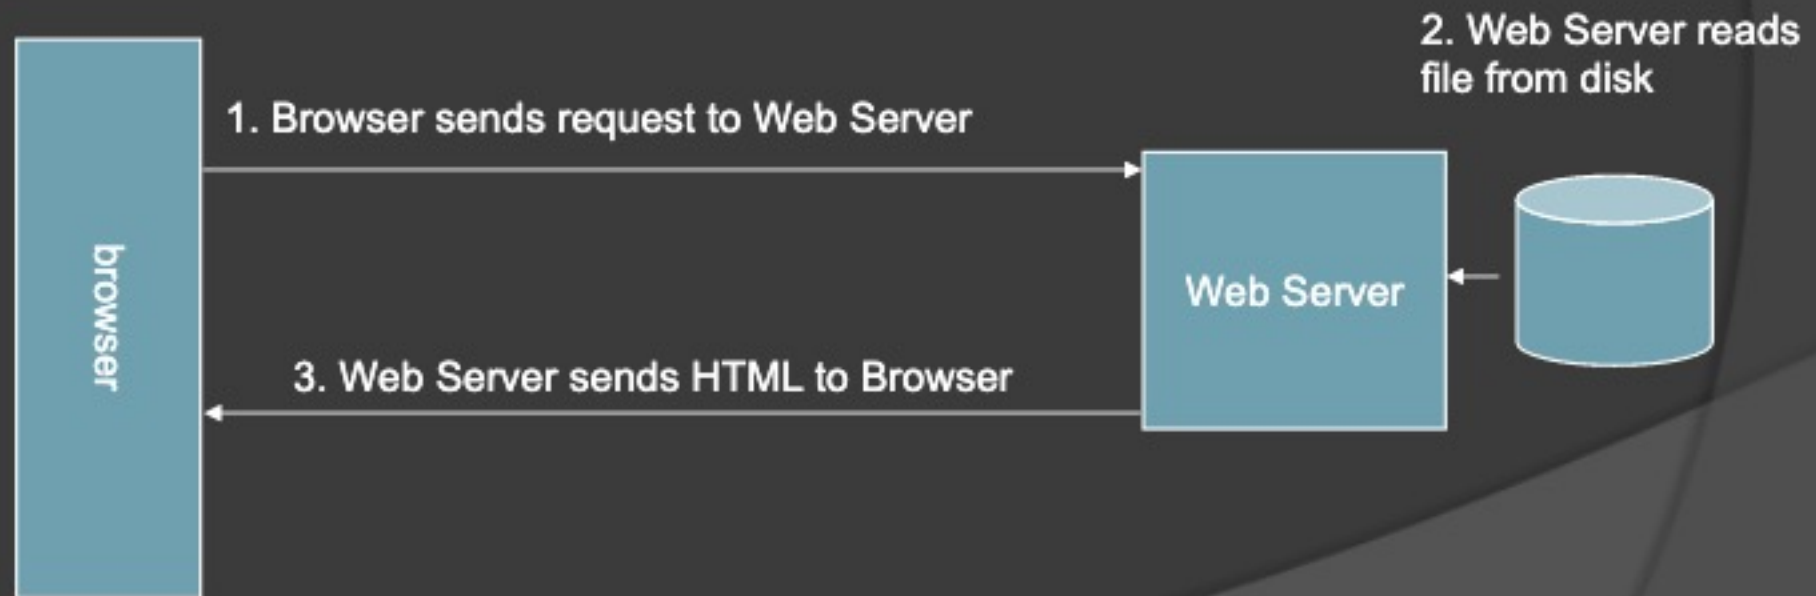

Web Server – Static HTML vs Dynamic

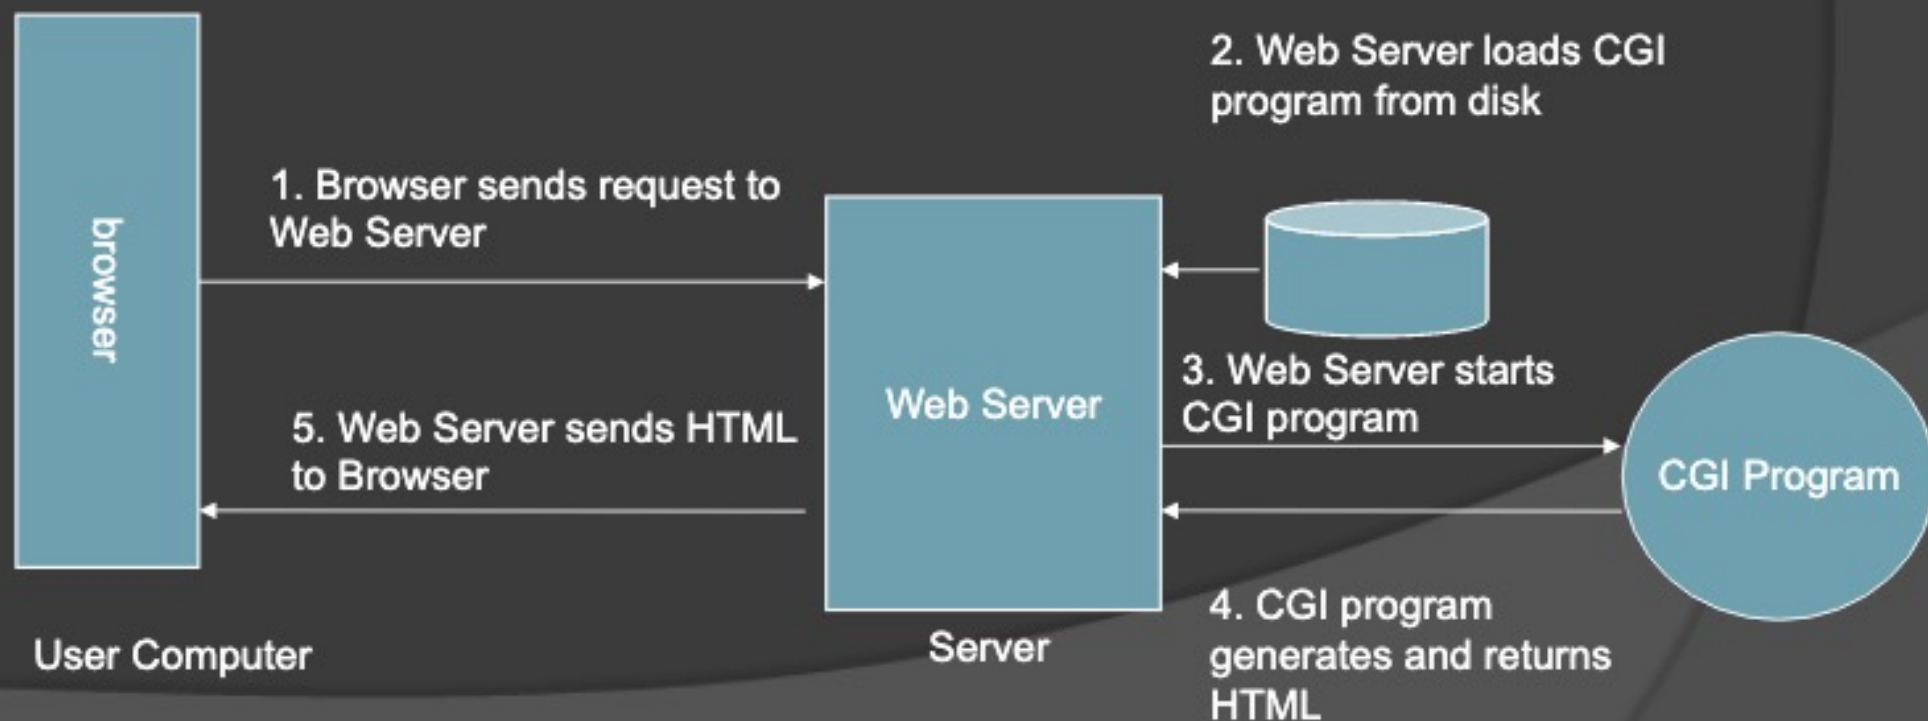

Static content

- Web Server delivers contents of a file (html)

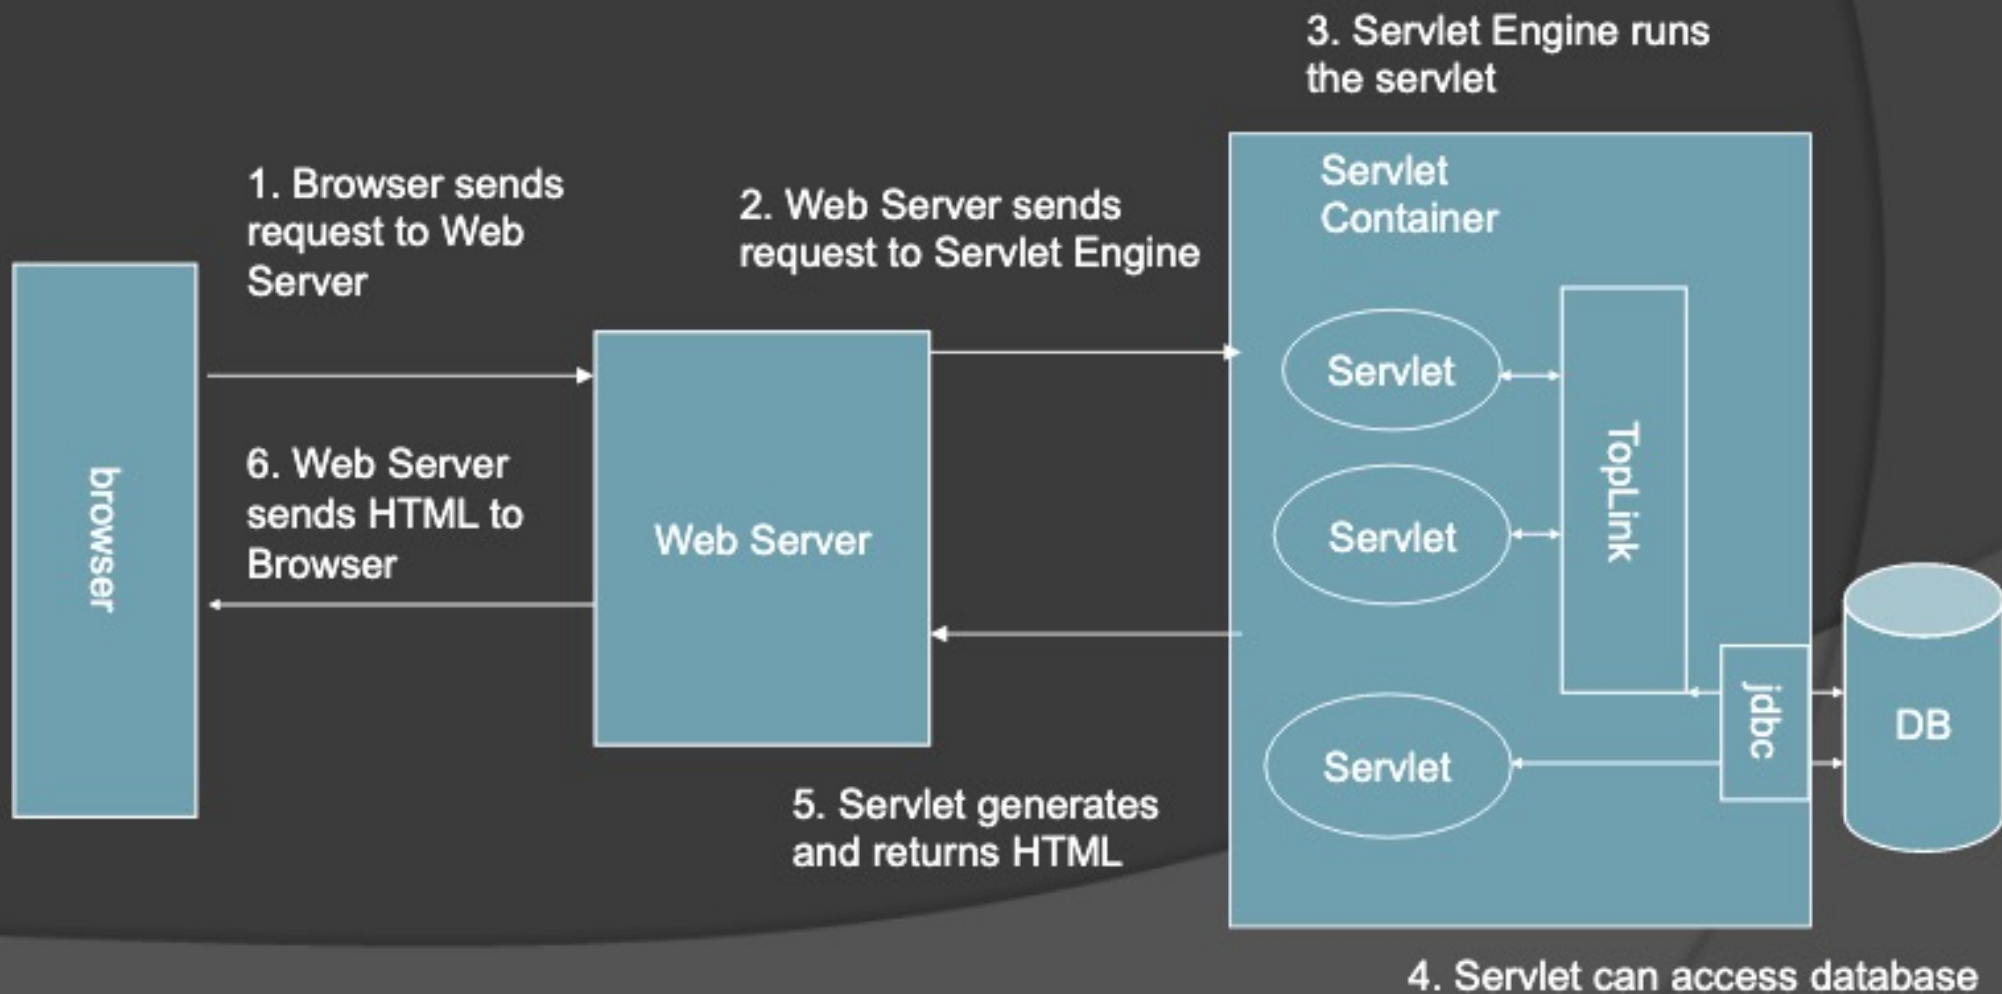

Dynamic Content

- CGI(Common Gateway Interface)program generates HTML that is returned to Browser

Java Servlet Diagram

● Extends Web Server
